

Lists and its Operations - Assignment

Assignment-1

1. Create a numeric vector `c(1:5)` and a 5 by 3 matrix with elements from 1 to 15.
2. Create a named list with vector, matrix and `iris` data set.
3. Retrieve the `iris` data set from the list using dollar operator and indexing method.
4. State the differences between the results obtained by using dollar operator and indexing method of accessing `iris`.
